

Advanced Textile Structures

Roadmap

CITEVE a strategic player on the advanced textile structures development

New Textile Structures :: Roadmap

2020 - 2025

Development of new and technical yarns

Development of new structures with innovative yarns in conventional equipment

Development of new advanced textile structures for reinforced and composite structures

Development of new advanced textile structures (woven, nonwoven, knitted), produced with high performance yarns (conductive, metallic, ceramic, bio-based) for new application

Additive manufacturing - 3D printing

Structures prepared by robots

Development of testing and validation methodologies

Interconnectivity technology
